

## Summary

This collection consists of 7 posters including a title poster, 6 vibrator posters, and a sex-related products poster. The content has dimensions 11" x 14". Each poster has dimensions 16" x 20" with the mat.

The vibrators posters of 396 selected vibrators and 27 vibrator kits that were designed for women and sold in the United States from the 1970s and continuing up to 2022. The vibrators of the 1970s – 2000s are collected from Kinsey Institute Archives, including Erotica dealers, Sex aids dealers, Good vibrations: mail order catalog, Playgirl (1973-2008), and On Our Backs (1984-2006). For each decade, I curate these vibrators that are iconic and/or provocative. Some vibrators were on the market across two decades; I categorize them into the former decade. In other words, the posters reflect more on the design date of the vibrators.

**The 1970s poster** includes 48 vibrators and 6 kits. They are mainly collected from *Adult Sexually Oriented Entertainment & Novelty Catalog*, *New Ideas*, *Eve's Garden Catalogue*, *Aphrodisia*, *Romeo*, *Enjoy (Enterprise catalog)*, *Evelyn Rainbird*, *The Pleasure Chest*, *The Xandria Collection*, *Erik Imports catalog*, and *The Bedside Companion*. The vibrator kits include *Sensual Encounter*, *Midnight Special*, *Anal Intruder*, *Prelude 3*, *Wonder Vibe*, and *Non Doctor*. The first three are from *Doc Johnson*, which is an iconic American pleasure products brand since 1976. At the beginning of their business, they promoted their vibrators and other products as "marital aids".

**The 1980s poster** includes 77 vibrators and 2 kits. They are mainly collected from *Party*, *Romeo*, *Lovelight's*, *Mellow Mail*, *Adam and Eve catalog*, *Evelyn Rainbird*, *The Xandria Collection*, and *Erik Imports catalog*. The kits are *Music Massager* and *The Home Entertainment*. Both included a vibrating penis ring.

**The 1990s poster** includes 63 vibrators and 5 kits. They are mainly collected from *Leisure (Time Products catalog)*, *Good Vibrations catalog*, *On Our Backs*, and *Playgirl*. The vibrator kits include *The Eroscillator*, *Wet and Dry Aquassager*, *Sybian*, *Magic Wand*, and *Octopus*. *Magic Wand* kit was not really sold as a kit originally. They are to show the popular attachment for Magic Wand in the 90s. *Octopus* kit also included a vibrating penis ring.

**The 2000s poster** includes 78 vibrators and 2 kits. They are mainly collected from *On Our Backs* and *Playgirl*. The vibrator kits include *Vibratex Rabbit Dance* and *Echo*.

**The 2010s poster** includes 63 vibrators and 6 kits. They are collected from personal websites for vibrator review and official Instagram pages of vibrators brands. Both of them provides of exact date of vibrators. The vibrator kits include *Cowgirl Sex Machine*, *Grand Bullet*, *Clue Vibe 3.OH*, *Petite*, *Orgasmatron X2*, and *PalmPower*.

**The 2020s poster** includes 67 vibrators and 6 kits. They are vibrators and kits that have been available on the market since 2020. The vibrator kits include *The Poet*, *Versa T*, *Secret Panty 2*, *Hyphy*, and *Petite*. The last one is to show these new attachments of Petite—a classical wand vibrator of Le Wand—in 2020s.

**The sex-related products poster** shows a collection of penis aids, ticklers, stimulators, and vibrators sleeves. **Penis aids** were designed as sex aids to help with a man's loss of erection during sex due to "premature ejaculation or other reasons". They were shaped into penis and were hollow. With straps, they could be worn by a man around their penis. **Ticklers** were sex aids that were designed to be worn by a man on his penis during sex to increase size of the penis and sensations for women. They could also be worn on a vibrator. Happy Tops are a special type of ticklers in a way that they can increase the size of a penis but do not cover all of it. They can also be worn on a vibrator. **Stimulators** are designed to be worn by a man on his penis or on a vibrator to stimulate the clitoris. **Vibrator sleeves** are designed to be worn on a penetrative vibrator. Tickler sleeves were based on the design of ticklers. What distinguishes them is the bodies of tickler sleeves were usually covered by spikes.
